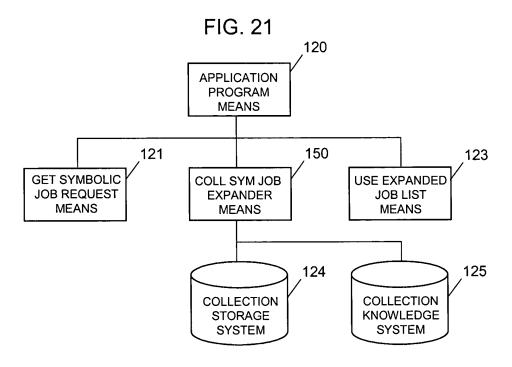

FIG. 22

- 1 # simplified algorithm for a program using a coll job expander
- 2 Call get symbolic job request means to get a symbolic job request
- 3 Call collection job expander means to expand symbolic request
- 4 Call use expanded job list means to use triplets on expanded job list

FIG. 23

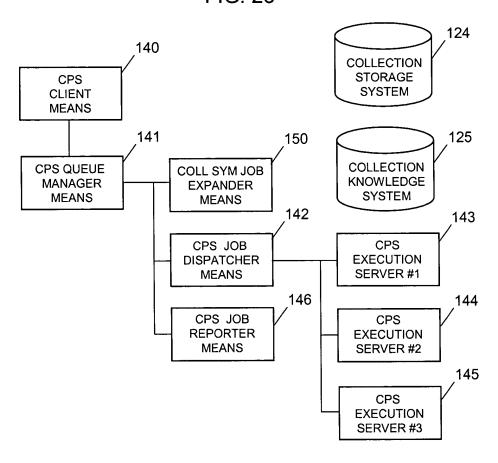

FIG. 24

- 1 # Simplified algorithm for a CPS queue manager means in a
- 2 # collection processing system
- 3 Receive collection symbolic job request from CPS client
- 4 Call collection job expander means to expand symbolic job request
- 5 Call job dispatcher means to execute individual expanded jobs
- 6 job dispatcher distributes individual job triplets among N servers
- 7 Call collection job reporter means to aggregate and report job results

FIG. 25

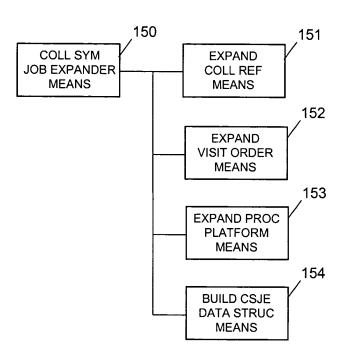

FIG. 26

- 1 # Simplified algorithm for a collection symbolic job expander means
- 2 #
- 3 Receive collection symbolic job request from caller
- 4 Call expand coll reference means to get list of individual collections
- 5 Call expand visit order means to get a visit order value for each coll
- 6 Call expand platform list means to get list of platforms for each coll
- 7 Build collection job expander info data structure to return to caller

FIG. 27

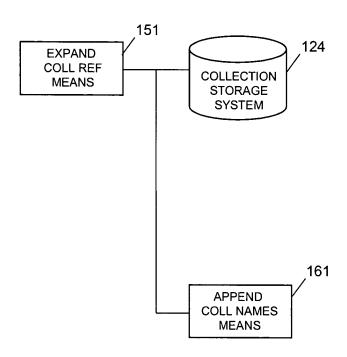

FIG. 28

- 1 # Simplified algorithm for an expand collection reference means
- 2 #
- 3 Receive unexpanded collection reference from caller
- 4 Call collection storage system to get list of individual collection names
- 5 Build csje-info data structure containing list of individual collection names
- 6 Return new data structure to caller

FIG. 29

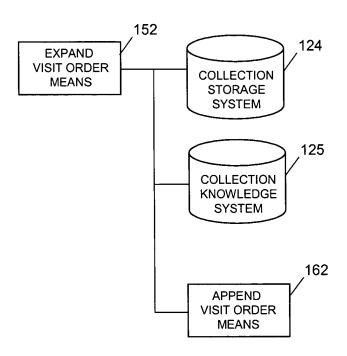

FIG. 30

- 1 # Simplified algorithm for an expand visit order means
- 2 #
- 3 Receive list of individual collection names from caller
- 4 Call collection storage system to get explicit visit orders for colls on list
- 5 Call collection storage system to get collection types for colls on list
- 6 Call collection knowledge system to get type definitions for colls on list
- 7 Use explict visit order vales in preference to coll-type-def visit orders
- 8 Append coll types and proper visit orders to csje-info data structure
- 9 Return augmented data structure to caller
